

WE ARE LOOKING FOR A

DevOps Engineer

We are looking for an experienced **DevOps Engineer** to join **Ekspress Grupp** in building and maintaining the largest media portals in Baltics.

Your role will be:

- Managing CI/CD pipelines
- Managing applications and environments in Kubernetes
- Configuring and automating logging, tracing, monitoring, and alerting services
- Configuring and automating backup and restore policies
- Improving deployment- and container-level security and automating security linting
- Organizing and keeping related documentation up-to-date

Expected experience and skills:

- Kubernetes and Docker
- Managing monitoring and alerting systems (Grafana, Prometheus or similar)
- Automation of daily tasks (Terraform, Ansible, GitLab CI/CD, ArgoCD or similar)
- Working with database services and object storage (MySQL, Redis, Elasticsearch, RabbitMQ, S3 or similar)
- Managing microservices or other distributed systems, as a bonus an experience in distributed tracing (Istio or similar)
- Working with large request and data volumes

Why Ekspress Grupp?

- Working with a wide stack of bleeding-edge technologies
- Building solutions for more than 2 million daily customers
- Agile and modern ways of working without overwhelming bureaucracy
- Full ownership of your tasks and decisions
- Full support for your professional growth
- Flat hierarchy and friendly atmosphere, open and honest communication and feedback
- Monthly team events, summer and winter retreat
